

Dagangan:

9. Mango Drink
Trade Name : Maaza Mango Drink
Brand : Maaza

Kod Tarif (Perintah Duti Kastam 2007) :

2009.80.919

Keterangan :

Dagangan dikatakan jus minuman mango dengan rupa bentuk fizikal sebagai cecair berwarna oren kemerahan. Berdasarkan label, dagangan mengandungi bahan-bahan seperti berikut: *15% pulp of mango fruit, water, sugar, citric acid, natural mango flavour, Vitamin C, preservative, colour no.E-110.*

Laporan kimia (PJ)IKA2612/09-0 bertarikh 18/11/2009 mengesahkan bahawa dagangan merupakan larutan berwarna jingga dalam botol plastik jernih dan berbau seperti mangga, mengandungi: air 84%, ekstrak tumbuhan, sukrosa, pewarna tiruan, nilai brix- 16.4° dan bahan pepejal 16%.

Dipek dalam botol plastik 1.5 litre dan boleh diminum terus tanpa perlu di tambah air..

Mesyuarat Panel Penetapan Penjenisan **Bil.15/2010** memutuskan kedua barangan ini sesuai diperjeniskan mengikut **GIR 1** di bawah kod tarif **2009.80 919** sebagai **other fruit juice ready for immediate consumption** berdasarkan alasan bahawa:

- Daripada analisis kimia brix level adalah 16.4° melebihi paras minima (13.5°). Ini bermaksud solid content adalah 16.4 dan paras air adalah 83.6° (100-16.4°). Oleh itu dagangan sesuai sebagai mango juice.
- Dagangan dibenarkan mengandungi gula, perwarna sebagaimana liputan di dalam EN IV-2009-2:

20.09 -Fruit juices (including grape must) and vegetable juices, unfermented and not containing added spirit, whether or not containing added sugar or other sweetening matter(+).

.....
2009.80.1 *-Juice of any other single fruit or vegetable*
.....

Provided they retain their original character, the fruit or vegetable juices of this heading may contain substances of the kinds listed below, whether these result from *the manufacturing process or have been added separately :*

- (1) *Sugar.*
- (2) *Other sweetening agents, natural or synthetic, provided that the quantity added does not exceed that necessary for normal sweetening purposes and that the juices otherwise qualify for this heading, in particular as regards the balance of the different constituents (see Item (4) below).*
- (3) *Products added to preserve the juice or to prevent fermentation (e.g., sulphur dioxide, carbon dioxide, enzymes).*
- (4) *Standardising agents (e.g., citric acid, tartaric acid) and products added to restore constituents destroyed or damaged during the manufacturing process (e.g., vitamins, colouring matter), or to " fix " the flavour (e.g., sorbitol added to powdered or crystalline citrus fruit juices).*

- Dagangan tidak sesuai diperjeniskan di bawah heading 2202 berdasarkan exclusion no (c), EN 2007 mukasurat IV-2202-1:

.....
This heading does not include :

.....
(c) Fruit or vegetable juices, whether or not used as beverages (heading 20.09).

Ini bermaksud yang ia menepati kriteria sebagai fruit juice walaupun dagangan boleh digunakan sebagai *beverages*.
