- d) *Strong waterabsorbing element*
- e) *Acquisition distribution layer*
- f) *Breathable bottom film*
- g) *Non-fluorescent tapes*
- h) *Separate tissue*

KETETAPAN

Ketua Pengarah Kastam memutuskan barangan ini sesuai diklasifikasikan di bawah kod tarif **9619.00.12 00 [PDK 2017]** sebagai **Sanitary towels of paper pulp of cellulose fibre** berdasarkan alasan seperti berikut:

- Barangan adalah tuala wanita (sanitary napkins). Berukuran 290mm. Oudourless. Setiap bungkusan mengandungi 8 keping sanitary napkin yang dibungkus berasingan bagi setiap keping.
- Barangan mendapat liputan di dalam EN HS 2017, muka surat XX-9619-1 seperti berikut:

96.19 - *Sanitary towels (pads) and tampons, napkins and napkin liners for babies and similar articles, of any material.*

This heading covers sanitary towels (pads) and tampons, napkins (diapers) and napkin liners for babies and similar articles, including absorbent hygienic nursing pads, napkins (diapers) for adults with incontinence and panty liners, of any material.

In general, the articles of this heading are disposable. Many of these articles are composed of (a) an inner layer (e.g., of nonwovens) designed to wick fluid from the wearer's skin and thereby prevent chafing; (b) an absorbent core for collecting and storing fluid until the product can be disposed of; and (c) an outer layer (e.g., of plastics) to prevent leakage of fluid from the absorbent core. The articles of this heading are usually shaped so that they may fit snugly to the human body. This heading also includes similar traditional articles made up solely of textile materials, which are usually re-usable following laundering.
