INTRODUCTION

1. This specific guide is prepared to assist businesses in understanding matters with regards to GST treatment on tax invoice and record keeping.

Overview of Goods and Services Tax (GST)

2. Goods and Services Tax (GST) is a multi-stage tax on domestic consumption. GST is charged on all taxable supplies of goods and services in Malaysia except those specifically exempted. GST is also charged on importation of goods and services into Malaysia.

3. Payment of tax is made in stages by the intermediaries in the production and distribution process. Although the tax would be paid throughout the production and distribution chain, only the value added at each stage is taxed thus avoiding double taxation.

4. In Malaysia, a person who is registered under the Goods and Services Tax Act 2014 is known as a “registered person”. A registered person is required to charge GST (output tax) on his taxable supply of goods and services made to his customers. He is allowed to claim back any GST incurred on his purchases (input tax) which are inputs to his business. Therefore, the tax itself is not a cost to the intermediaries and does not appear as an expense item in their financial statements.

OVERVIEW OF TAX INVOICE

5. The most important document in the GST system is the tax invoice. This document is generally issued by the supplier notifying the purchaser of the obligation to make payment in respect of any transaction. It contains certain information such as details of registered person and supply, GST rate and the amount of GST payable as stipulated under the GST law. A tax invoice is essential evidence to:

(a) support a registered person’s claim for the deduction of GST (input tax) incurred on his standard rated purchases;
(b) trigger the time of supply as the invoice date will determine when GST is to be accounted for by a registered person on the supply of goods and services (accounting on invoice basis);

**Example 1**

A furniture manufacturer (GST registered person on a monthly taxable period) supplies furniture to a retailer on 15 June 2015. The manufacturer issues an invoice on 20 June 2015 and payment is received on 3 July 2015. 20 June 2015, which is the date of the tax invoice, is the time of supply and the registered person has to account for GST to the tax authority during his taxable period of June even though payment is received on 3 July 2015.

(c) determine which supplies made by him should be included in a particular taxable period;

**Example 2**

Based on example in subparagraph (b) above, the due date to file his return for the supply of furniture should not be later than the last day of July 2015 i.e. based on the date of the invoice since the taxable period of the manufacturer is June 2015.

(d) determine when he may claim his input tax based on the tax invoice received from his supplier;

**Example 3**

The retailer, being registered for GST can claim his input tax or GST charged on the purchase of furniture for use in his taxable activity. Input tax can be claimed by the retailer as long as he has a tax invoice from his supplier even though he has not paid for the supply.
Issuance of Tax Invoice

6. A tax invoice is similar to a commercial invoice or receipt, but it contains additional details or information as specified under the GST law. Generally, every registered person who makes taxable supply of goods and services is required to issue a tax invoice.

7. Tax invoices must be issued within twenty one (21) days from the time of supply. The supplier must keep a copy of the tax invoice and the original should be retained by the recipient. Only GST registered person can issue tax invoice either in electronic or printed form.

8. As a registered person, you need to have a tax invoice to claim input tax credit. Without a proper tax invoice, a GST registered person and his customers who are also registered persons, cannot claim GST incurred on their purchases of taxable goods or services. In addition, foreign purchasers (tourist) require tax invoice to claim GST refund on their purchases of taxable goods.

9. However, under certain circumstances (disallowed input tax) you may not be entitled to claim input tax even though you have a tax invoice from the supplier.

Non Issuance of Tax Invoice

10. A tax invoice is not required to be issued when a registered person makes the following supply:

   (a) a zero-rated supply;

   (b) a supply without consideration on which tax is charged (deemed supply);

   Example 4:

   A supply of gift worth more than RM500.00 to a client in the course of business or business assets put to private use by the supplier.

11. However, a tax invoice in respect of zero-rated and deemed supplies must be issued for the purpose of claiming input tax when the customer who is a registered
person requested for it. If a tax invoice is issued for zero-rated supply, the supplier must indicate that GST is charged at zero percent (0%).

12. Tax invoice shall not be issued for:

   (a) any supply of second-hand goods under the margin scheme;
   (b) any supply of imported services; and
   (c) any supply of treated or processed goods which is deemed to have been supplied by the recipient under approved toll manufacturer scheme;

13. No invoice showing an amount which purports to be a tax shall be issued –

   (a) on any supply of goods or services which is not a taxable supply;
   (b) on any zero-rated supply; or
   (c) by a non-registered person.

TYPES OF TAX INVOICE

14. The issuing of tax invoice can be classified as follows:-

   (a) Tax invoice
      (i) Full tax invoice
      (ii) Simplified tax invoice
   (b) Deemed tax invoice
      (i) Self-billed invoice
      (ii) Invoice or statement of sales by auctioneer

Full Tax Invoice

15. A full tax invoice should contain the following information:

   (a) the word ‘tax invoice’ in a prominent place;
   (b) the tax invoice serial number;
(c) the date of issuance of the tax invoice;

(d) the name, address and identification number of the supplier;

(e) the name and address of the person to whom the goods or services are supplied;

(f) a description sufficient to identify the goods or services supplied;

(g) for each description, distinguish the type of supply for zero rate, standard rate and exempt, the quantity of the goods or the extent of the services supplied and the amount payable, excluding tax;

(h) any discount offered;

(i) the total amount payable excluding tax, the rate of tax and the total tax chargeable to be shown separately;

(j) the total amount payable inclusive of the total tax chargeable; and

(k) any amount referred to in subparagraphs (i) and (j), expressed in a currency, other than Ringgit, shall also be expressed in Ringgit in accordance with paragraph 5 of the Third Schedule of the GST Act 2014.

Example of a full tax invoice is shown in Figure 1 below.
Tax Invoice for Mixed Supplies

16. A tax invoice may contain details of more than one supply (taxable supply and exempt supply). For example, invoice issued by an insurance company for supply of medical insurance, fire insurance, motor vehicle insurance (standard rate) and life insurance (exempt) to the same buyer. When this occurs, the tax invoice (full or simplified tax invoice) must clearly distinguish between the various supplies and indicate separately the applicable values and the tax charged (if any) on each supply.
for GST purpose. Registered person may use any preferred indicators to distinguish the various supplies. Examples of a full tax invoice for the mixed supplies are as follows:

Simplified Tax Invoice

17. There are instances where the Director General may, upon request in writing allow registered persons to issue simplified tax invoice to their customers in accordance with section 33(3) of the GST Act 2014. Issuance of this invoice normally involves retailers who generate large volume of invoices such as hypermarkets, mini markets, restaurants, beauty salons, petrol kiosks, motor workshops and other point of sales outlets.

18. A simplified tax invoice can be issued regardless of any sales amount and can take the form of an invoice, receipt, voucher or any other similar document provided it contains the particulars approved by the Director General. For instance, a registered person applies to the Director General to allow him to omit from the full tax invoice the following prescribed particulars:

(a) the words “Tax Invoice”
(b) the name and address of the recipient; and
(c) the price and tax for each item to be shown separately.

In this case, the Director General may allow such invoice to be issued by the registered person provided the invoice contains the following particulars:

(a) the name, address and identification number of the supplier;
(b) the date of issuance of the tax invoice;
(c) the tax invoice serial number;
(d) a description sufficient to identify the goods or services supplied;
(e) for each description, distinguish the type of supply for zero rate, standard rate and exempt, the quantity of the goods or the extent of the services supplied and the amount payable, including tax;
(f) the total amount payable inclusive of total tax chargeable; and
(g) the rate of tax and the amount of tax chargeable.

Examples of a simplified tax invoice are shown in Figure 6, 7 and 8 below.

Simplified Tax Invoice and Input Tax Claim

19. Simplified tax invoice can be used to claim input tax. In the case of an approved tax invoice without the name and address of the recipient, the allowed input tax amount claimable is RM30.00 or less. If the GST amount is more than RM30.00, he can only claim the input tax up to a limit of RM30.00 using this invoice. Therefore, he must request for a tax invoice with the name and address of the recipient to enable him to claim the full input tax if it is more than RM30.00.

20. The supplier has to retain the original invoice, invalidate it and keep record of the cancelled tax invoice when the replacement tax invoice with recipient’s name and address is issued.

Example 5

Ali, a GST registered person, purchased goods worth RM590.00 inclusive of GST RM33.40 (6/106 x RM590.00) at a hypermarket and enquired whether he can use the simplified tax invoice which does not have the name and address of the recipient, issued to him to claim the full input tax.

Ali can claim input tax for the GST amount up to RM30.00 with this simplified tax invoice. If he wants to claim the full input tax amount of RM33.40, then he has to request for a tax invoice with his name and address. When this happens, Ali has to return the invoice without his name and address to the supplier.

Receipt

21. A receipt is a written (electronic or manual) acknowledgement that a specified article or sum of money has been received as an exchange for goods or services. A receipt or other document can be a tax invoice if it has all the particulars of a full tax invoice or simplified tax invoice approved by the Director General.

Question 1

Can a sales receipt be accepted as a full tax invoice if it has all the particulars of a full tax invoice?

Yes, if the sales receipt has all the particulars of a full tax invoice.
Question 2

Ahmad, a GST registered person, supplied taxable goods to his customer (GST registered person) who used a credit card to make payment. Can the sales receipt he issued be used by the customer to claim input tax?

If your customer purchase taxable goods or services and make payment using credit cards (e.g. Visa, Master Card etc), you may give the cardholder a sales receipt at the time of sale. The sales receipt may be accepted as a simplified tax invoice if it contains the details of a simplified tax invoice as approved by the Director General.

Question 3

Sometimes receipts or simplified tax invoices issued by retailers are printed on thermal papers and as time goes by the print can fade. What should I do if GST audit request for these invoices?

If you are a GST registered person and intent to claim input tax credit on your acquisitions, you should scan or make a photocopy of such invoices.

Question 4

John, a GST registered person holds a simplified tax invoice (without recipient’s name and address) from a hypermarket for goods purchased for his business. The GST amount is RM35.00 (input tax claimable is RM30.00 with such invoice). What will happen to that original tax invoice when a request is made by him for a tax invoice with his name and address for the purpose of claiming full input tax credit?

In this case, the hypermarket must take back the original tax invoice, invalidate it and keep records of the cancelled tax invoice before replacing with another tax invoice stating the original tax invoice date.

Self-Billed Invoice

22. Under certain circumstances, the value of supply is determined by the person who receives the goods. Therefore, for GST purposes the recipient of the goods is allowed to issue an invoice to himself which is deemed to be a tax invoice in respect
of a supply of goods or services to him by another registered person. The issuance of this self-billed invoice by the recipient to himself under subsection 33(5) of the GST Act 2014 shall be subject to the following conditions:

(a) the value is not known by the supplier at the time of making the supply;
(b) the recipient and the supplier are both registered persons;
(c) the recipient and the supplier agree in writing to a self-billed invoice; and
(d) the supplier and the recipient agree that the supplier shall not issue a tax invoice in respect of any supply;

23. Any recipient approved by the Director General to issue self-billed invoice, shall be subjected to the following conditions:

(a) the document may, with the prior approval of the Director General, be treated as a tax invoice;
(b) a copy of any self-billed invoice is to be provided to the supplier and a copy is to be retained by the recipient; and
(c) in the case where the self-billed invoice is issued before the time of removal of such goods, or before the time the goods are made available, or before the time the services are performed, the self-billed invoice shall be issued with payment.

Who Can Issue Self-Billed Invoice?

24. In a normal business transaction, the supplier will issue an invoice to the buyer. However, in the case of self-billed invoice the buyer will issue an invoice because the supplier is unable to determine the value of the supply. A copy of the invoice should be retained by the supplier whereas the original invoice should be retained by the recipient/buyer to claim input tax (GST paid on inputs). For example, tobacco manufacturers issue tax invoices to growers who supply tobacco leaves. Since the recipient/buyer knows the open market value of the tobacco leaves, thus they are the best able to provide the necessary information on the value of the product and will therefore issue a self-billed invoice.
25. You can only issue self-billed invoice upon approval given by the Director General. The reference number of the approval must be stated in the self-billed invoice. Your approval can be cancelled at any time if it is found that you do not meet the specified requirements for such invoices.

26. The recipient approved by the Director General to issue a self-billed invoice shall state the following particulars on the invoice:

(a) the supplier’s and recipient’s name; address and identification number;
(b) the word self-billed invoice in a prominent place;
(c) the invoice serial number;
(d) the date of invoice;
(e) the reference number of Director General’s approval;
(f) a description sufficient to identify the goods or services supplied;
(g) for each description, distinguish the type of supply for standard rate, zero rate and exempt, the quantity of the goods or the extent of the services and the amount payable, excluding tax;
(h) any discount offered;
(i) the total amount payable excluding tax, the rate of tax and the total tax chargeable shown as a separate amount;
(j) the total amount payable inclusive of total tax chargeable; and
(k) any amount referred to in subparagraphs (i) and (j), expressed in a currency, other than Ringgit, shall also be expressed in Ringgit in accordance with paragraph 5 of the Third Schedule of the Act.

Example of a self-billed invoice is shown in Figure 9.

Contents of Written Agreement on Self-Billing

27. A self-billed invoice can only be issued under a written agreement between the recipient/buyer and the supplier. A self-billing agreement shall contain the following information:

(a) the recipient/buyer’s name and GST identification number;
(b) the supplier’s name and GST identification number;
(c) the buyer agrees to issue self-billed invoices for all supplies made to him/her by the supplier for a specified period which shall end not later than either the expiry date of a period of twelve (12) months, or the expiry date of the contract between the buyer and supplier;
(d) the buyer agrees to issue self-billed invoices showing the supplier’s name, address and GST identification number, and other details that make up a full tax invoice;
(e) the buyer agrees to inform the supplier if the issuance of self-billed invoices were to be outsourced to a third party such as an accounting firm or tax agent, giving details of the third party;
(f) the buyer agrees to make a new self-billing agreement in the event that their GST identification number changes;
(g) the supplier agrees to accept the self-billed invoices issued by the buyer for supplies covered by the agreement;
(h) the supplier agrees not to issue GST invoices for supplies covered by the agreement; and
(i) the supplier and recipient will notify each other if either one of them ceases to be registered for GST, transfers his business as a going concern or becomes registered under a new GST identification number.

Document Issued by Auctioneer

28. Supplies made by auctioneer acting in his own name are regarded as supplies made by the principal or owner of the goods put up for auction. If the principal is a taxable person, the auctioneer whether or not he is a taxable person shall be liable
to account for output tax on any goods which have been auctioned on the principal’s behalf. In this situation, the auctioneer whether he is registered or not, has to issue a billing document to the buyer in the form of statement of sales or invoice which may be regarded as a tax invoice based on the tax inclusive principle.

29. The statement of sale or invoice should contain the following details:

(a) auctioneer’s name, address and business registration number;

(b) buyer’s name and address;

(c) date of issue;

(d) serial number of invoice;

(e) the description sufficient to identify the goods or services supplied;

(f) the total amount payable inclusive of GST;

(g) the rate of tax;

(h) total tax chargeable; and

(i) the word “Price payable inclusive of GST”.

Example of an auctioneer’s statement of sales or invoice is shown in Figure 10.

Tax Invoice and Supply Given Relief

30. Under the GST Act 2014, the Minister may grant relief to any person or class of persons from the payment of the whole or any part of the tax on any taxable supply of goods or services or any importation of goods or class of goods. A taxable person shall be relieved from charging and collecting GST on taxable supply of goods or services made to such person or class of persons. GST should not be charged on the amount of taxable supply and the tax invoice issued to such person shall state the clause “Relieved from charging GST for supply to a person given relief under Item ...., Schedule ...... of GST (Relief) Order 2014”. Example of a tax invoice for supply given relief is as follows:
**Figure 11: Example of Tax Invoice for Supply Given Relief**

**Tax Invoice in Foreign Currency**

31. If a registered person issues a tax invoice in a foreign currency, the following items on the tax invoice must be converted into Ringgit for GST purposes:

(a) the total amount payable (excluding GST);

(b) the total tax chargeable; and
(c) the total amount payable (including GST).

32. For foreign currency conversion, there is no requirement to write in for approval. The use of the following exchange rates corresponding to the time of supply is acceptable by the Royal Malaysian Customs (Customs):

(a) In the case of local transaction, the use of daily exchange rates, selling rate in accordance with paragraph 5 of the Third Schedule of the GST Act 2014) of any bank operating in Malaysia is acceptable. Example of a local tax invoice in foreign currency is shown in Figure 12.

(b) In the case of importation of goods, conversion of foreign currency should be at the exchange rates published weekly by Customs.

Importation of Goods and Services

33. Importation of goods and services are subject to GST. GST for imported goods are declared and paid at the time of importation based on the invoice from the overseas supplier using customs declaration forms (Customs Form No. 1 or 9). These declaration forms together with the Customs Official Receipt (COR) will be sufficient for the purpose of input tax claim by the importer or buyer. As for GST on imported services, it is accounted by way of the reverse charge mechanism and tax invoice is not issued for such supply (For further information on Reverse Charge Mechanism, please refer to GST Guide on Imported Service. Thus, the need to issue a tax invoice in the case of imported goods and services is not applicable.

Electronic Tax Invoice

34. Under Section 34 GST Act 2014, a registered person shall be treated as having issued a tax invoice to another person notwithstanding that there is no delivery of any equivalent document in paper form to the person if the required particulars of the tax invoice are recorded in a computer and are:

   (a) transmitted or made available to the person by electronic means (including emails, facsimiles etc); or
   (b) produced on any material other than paper and is delivered to the person.

35. If tax invoices, receipts, credit or debit notes are issued electronically, these documents should be readily accessible and convertible into writing. The requirements for these electronic documents are as follows:

   (a) the intended recipients must confirm in writing that they are prepared to accept electronic documents under the conditions set out. (This authorisation must be retained by the supplier for a period of seven years after the issuance of the last electronic document to the recipient).
   (b) both the supplier and the recipient of the supply must retain the documents in readable and encrypted form for a period of seven years
from the date of the supply. They must also have access to the necessary codes or other means available to enable Customs auditors to compare the documents in readable form with those in encrypted form.

(c) for tax invoices, receipts, credit or debit notes that are issued manually and is subsequently converted into an electronic form, these documents should be retained in its original form prior to the conversion.

(d) taxable person must establish controls to ensure the electronic tax invoice cannot be manipulated before and during transmission.

(e) taxable person should not issue tax invoice in paper form to customers when the electronic tax invoice has already been issued. In the event the tax invoice needs to be issued in paper form, then necessary measures need to be taken to prevent the input tax being claimed twice by the customer e.g. invalidate either the paper form or electronic form of the tax invoice issued.

(f) the taxable person should print and keep hard copies of the electronic tax invoices issued if he does not intent to store the tax invoices electronically.

Lost or Misplaced Tax Invoice

36. Whenever a tax invoice of a particular supply is lost or misplaced, you may request the supplier to provide a certified true copy of the tax invoice as it is an offence to issue more than one tax invoice per taxable supply. This certified copy of tax invoice can be used for claiming input tax as long as the document is clearly marked “COPY” by the supplier.

Pro forma Invoice

37. A pro forma invoice is not regarded as a tax invoice. You can only claim input tax in your GST return if you have a proper tax invoice. If your supplier does not give you a proper tax invoice, you should ask for one.
CREDIT NOTE AND DEBIT NOTE

38. The GST Act provides the requirement for the issuance of credit and debit notes in respect of a supply. The consideration for a particular supply can only be altered by means of a credit or debit note as it is against Generally Accepted Accounting Principle (GAAP) to merely issue another tax invoice to cover such supply.

39. Credit and debit notes provide a mechanism to allow the supplier to make the necessary adjustments in respect of a taxable supply after the tax invoice has been issued because there are subsequent changes (decreases or increases) in the original value of the supply.

40. The issuance of credit and debit notes by the registered person occurs when there is:

   (a) a change in the rate of tax in force under section 10 of the Act or a change in the descriptions of the zero-rated or exempt supply under section 17 or 18 of the Act as the case may be; or

   (b) any adjustment in the course of business such as cancellation in the supply of goods and services, under or over stated GST amount and goods returned,

and the change occurs after the return for the supply has been submitted to the Director General, a credit note or debit note shall be issued by the person making or receiving the supply.

41. When a credit note or debit note is issued relating to the change in rate or descriptions, the supplier and recipient who are registered persons shall make adjustments in the return for the taxable period where the change occurs.

42. In the case of credit note or debit note issued for any adjustment made in the course of business, the supplier and recipient who are registered persons shall make adjustments in the return for the taxable period in which the credit note or debit note is issued or received.
Credit Notes

43. Credit notes are issued by the supplier when the value for a supply is reduced after a tax invoice has been issued. These notes are issued to correct a genuine mistake or to give a proper credit when there is a change in rate or description; or when adjustments are made in the course of business.

(a) Change in rate or description

A credit note should be issued if there is a change from a higher rate of GST to a lower rate or a change in description of a supply from a standard-rated supply to a zero-rated or exempt supply.

Example 6

Change in rate from standard rate (6%) to (5%)

Invoice Amount (inclusive GST RM1,200): RM21,200

(invoice issued and tax has been accounted before the change in rate)

Payment received after the change in rate: RM21,200
(inclusive GST RM1,200)

Value of the supply of goods where the goods are wholly removed after the change in rate (excluding GST RM1,200)

Since the payment received and goods are removed after the change in rate, there will be GST at 5% imposed on the supply of goods in accordance with section 66 of the Act. Therefore, a credit note amounting to RM200 [(RM20,000 x 6%) – (RM20,000 x 5%)] will be issued to the recipient due to the change in rate. The total payment after adjustment for change in rate is calculated as follows:

Invoice Amount: RM21,200
(inclusive GST RM1,200)
Credit note amount: \[ (RM20,000 \times 6\%) - (RM20,000 \times 5\%) \] = RM200

Total payment after the change in rate: \( (RM21,200 - RM200) \) = RM21,000

Example 7

Change in rate from standard rate (6%) to (5%)

Invoice Amount (inclusive GST RM1,200): \( RM21,200 \)
(invoice issued and tax has been accounted before the change in rate)

Payment received before the change in rate: \( RM10,600 \)
(inclusive GST RM600)

Value of supply of goods where the goods are partly removed before the change in rate:
(excluding GST RM900)

Since the value of supply of goods removed is higher than the payment received before the change in rate, 6% GST is charged on RM15,000 and GST at 5% is imposed on the balance of RM5,000 in accordance with section 66 of the Act. Therefore, a credit note amounting to RM50 will be issued to the recipient due to the change in rate \( (RM5,000 \times 6\% - RM5,000 \times 5\% = RM50) \). The total payment after adjustment for change in rate is calculated as follows:

Invoice Amount (inclusive GST RM1,200): \( RM21,200 \)
(invoice issued and tax has been accounted before the change in rate)

Credit note amount: \( RM50 \)
Example 8

Change in rate from standard rate (6%) to (5%)

Invoice Amount (inclusive GST RM1,200): RM21,200
(invoice issued and tax has been accounted before the change in rate)

Payment received before the change in rate: RM15,900
(inclusive GST RM900)

Value of supply of goods where the goods are partly removed before the change in rate
(excluding GST RM600)

Since the payment received is higher than the value of supply of goods removed before the change in rate, 6% GST is charged on RM15,000 and GST at 5% is imposed on the balance of RM5,000 in accordance with section 66 of the Act. Therefore, a credit note amounting to RM50 will be issued to the recipient due to the change in rate (RM5,000 x 6% – RM5,000 x 5% = RM50). The total payment after adjustment for change in rate is calculated as follows:

Invoice Amount (inclusive GST RM1,200): RM21,200
(invoice issued and tax has been accounted before the change in rate)

Credit note amount: RM50

Total payment after change in rate: RM21,150
Similarly, example 1, 2 and 3 above will also apply to such situations when there is a change:

(i) from a higher rate to a lower rate
(ii) in description from standard rate to zero rate
(iii) in description from standard rate to exempt supply

(b) Adjustments in the course of business

A credit note should be issued if there is a change in consideration as a result of adjustments in the course of business such as:

(i) when the goods invoiced as standard-rated should be exempt or zero-rated;
(ii) the supply of goods or services is cancelled;
(iii) consideration for the goods have been partly or fully waived;
(iv) quantity discount given after goods have been supplied;
(v) when sub-standard goods are accepted by the customer at a reduced price;
(vi) goods are returned or services are not accepted; or
(vii) goods and services are supplied for an unascertained consideration.

Example 9

On 1 June 2015, Kamal Sdn. Bhd. a wholesaler of toys issued a sales invoice for amount RM2,120 for the supply of 20 sets of baby walker to Cute Baby Enterprise at RM100 per unit. On the same day, Cute Baby Enterprise cancelled the purchase of the walkers. Subsequently, Kamal Sdn. Bhd. issued a credit note that shows the value of RM2,000 (RM100 x 20) for the walkers and the GST amount of RM120 (RM2,000 x 6%). The total charge to be cancelled including GST is RM2,120.
Debit Notes

44. Debit notes are issued by the supplier when the value of the supply is increased after a tax invoice was issued. These notes are issued to correct a genuine mistake or to give a proper debit when there is a change in rate or description; or when adjustments are made in the course of business.

(a) Change in rate or descriptions

A debit note should be issued if there is a change from a lower rate of GST to a higher rate or a change in description of a supply from a zero-rated or exempt supply to a standard-rated supply.

*Example 10*

*Change in rate from standard rate (6%) to (7%)*

*Invoice Amount (inclusive GST RM1,200):* RM21,200

*Payment received after the change in rate* RM21,200

*(inclusive GST RM1,200)*

*Value of the supply of goods where the goods are wholly removed after the change in rate* RM20,000

*(excluding GST RM1,200)*

Since the payment received and goods are removed after the change in rate, there will be GST at 7% imposed on the supply of goods in accordance with section 66 of the Act. Therefore, a debit note amounting to RM200 [(RM20,000 x 7%) – (RM20,000 x 6%)] will be issued to the recipient due to the change in rate. The total payment after adjustment for change in rate is calculated as follows:

*Invoice Amount:* RM21,200
Example 11

Change in rate from standard rate (6%) to (7%)

Invoice Amount (inclusive GST RM1,200): RM21,200

Payment received before the change in rate: RM10,600

Value of supply of goods where the goods are partly removed before the change in rate: RM15,000

Since the value of supply of goods removed is higher than the payment received before the change in rate, 6% GST is charged on RM15,000 and GST at 7% is imposed on the balance of RM5,000 in accordance with section 66 of the Act. Therefore, a debit note amounting to RM50 will be issued to the recipient due to the change in rate (RM5,000 x 7% – RM5,000 x 6% = RM50). The total payment after adjustment for change in rate is calculated as follows:

Invoice Amount (inclusive GST RM1,200): RM21,200

Debit note amount: RM50

[((RM5,000 x 7%) – (RM5,000 x 6%)]
Total payment after change in rate: RM21,250
(RM21,200 + RM50)

Example 12

Change in rate from standard rate (6%) to (7%)

Invoice Amount (inclusive GST RM1,200): RM21,200
(invoice issued and tax has been accounted before the change in rate)

Payment received before the change in rate: RM15,900
(inclusive GST RM900)

Value of supply of goods where the goods are partly removed before the change in rate:
(excluding GST RM600)

Since the payment received is higher than the value of supply of goods removed before the change in rate, 6% GST is charged on RM15,000 and GST at 7% is imposed on the balance of RM5,000 in accordance with section 66 of the Act. Therefore, a debit note amounting to RM50 will be issued to the recipient due to the change in rate (RM5,000 x 7% – RM5,000 x 6% = RM50). The total payment after adjustment for change in rate is calculated as follows:

Invoice Amount (inclusive GST RM1,200) RM21,200
(invoice issued and tax has been accounted before the change in rate)

Debit note amount: RM50

[(RM5,000 x 7%) – (RM5,000 x 6%)]

Total payment after change in rate: RM21,250
(RM21,200 + RM50)
Similarly, example 1, 2 and 3 above will also apply to such situations when there is a change:

(i) from a lower rate to a higher rate
(ii) in description from zero rate to standard rate
(iii) in description from exempt supply to standard rate

(b) Adjustments in the course of business

A debit note should be issued if there is a change in consideration as a result of adjustments in the course of business such as:

(i) when the goods invoiced as exempt or zero-rated should be standard-rated;
(ii) additional charges such as transportation cost imposed after delivery of goods;
(iii) when goods delivered to the customer are under-priced;
(iv) over supply of goods or services to the customer; or
(v) goods or services are supplied for an unascertained consideration.

Example 13

An invoice for the amount RM1,500 was issued by Modern Sdn. Bhd. for supply of 50kg rice at RM30/kg to Esa, a retailer. No GST was charged on the zero rated supply of rice. After one week, Modern Sdn. Bhd. discovered that 10kg biscuits at RM30/kg and 40kg rice were actually supplied to Esa. Due to the change in consideration from RM1,500 to RM1,518, a debit note for RM18 was issued by Modern Sdn. Bhd. to claim the GST amount on the taxable supply of biscuits (RM300 x 6%).

Details on Credit and Debit Notes

45. In accordance with the GST Regulations 2014, the following details should appear in the credit and debit notes:
(a) the words “credit note” or “debit note” in a prominent place;
(b) the serial number and date of issue;
(c) the name, address and GST identification number of the supplier;
(d) the name and address of the person to whom the goods or services are supplied;
(e) the reasons for its issue;
(f) description of the goods or services;
(g) the quantity and amount for each supply;
(h) the total amount excluding tax;
(i) the rate and amount of tax; and
(j) the number and date of the original tax invoice.

Example of credit note and debit note are as shown in Figure 13 and Figure 14 respectively.

Keeping Record on Credit

46. The recipient must keep a record of all credits received from the suppliers. If the recipient normally issue debit notes to suppliers from whom credit is due and adjust the recipient’s records at that stage, the debit notes must show details similar to those required for credit notes, i.e. the credit notes from the suppliers must matched with the debit notes issued by the recipient for the same supply. Likewise, the supplier must also keep a record of all credits given to the recipients and make the necessary adjustments. The recipient and the supplier should ensure that adjustments are made only once and that the credit and debit notes are not used simultaneously as accounting documents.

RECORD KEEPING

47. Section 36 of the GST Act 2014 requires every taxable person and certain non-taxable person to keep full and true records of all transactions which affect or may affect his liability to tax. These records should be kept in Malaysia except as otherwise approved by the Director General and shall be in the national or English language, and should be preserved for a period of seven years from the latest date to which the records relate.

48. The certain non-taxable persons mentioned above are as follows:

(a) any person who has ceased to be a taxable person and has made/may make bad debt relief claim;

(b) imported services supplied to the recipient, who is a non-taxable person, for the purposes of business;

(c) goods of a taxable person are sold by a non-taxable person to recover any debt owed by the taxable person;

(d) supply by the auctioneer, who is a non-taxable person in his own name on behalf of the principal/owner of the goods who is a taxable person; and

(e) a non-taxable person in Malaysia, who receives goods (in the course or furtherance of business) from an approved toll manufacturer.
49. Any person, who contravenes Section 36 GST Act 2014, commits an offence and shall, on conviction, be liable to a fine not exceeding fifty thousand ringgit or to imprisonment for a term not exceeding three (3) years or to both.

**What are Records?**

50. Records are documents which include all books of account or relevant computer print-outs (if a computer is used), as well as supporting documents. If the record is in an electronically readable form, a manual to the software must be available. Records include:

   (a) all records of goods or services supplied by or to that taxable person including tax invoices, invoices, statement of sales, receipts, credit note, debit note and export declaration forms;

   (b) all records of importations of goods;

   (c) physical books of account, financial statement and paper based source documents including computer printouts of business and accounting records;

   (d) electronic records; and

   (e) all details of the accounting system, including charts, codes of accounts, instruction manuals, system and program documentation and specification, etc.

51. All taxable persons and certain non-taxable persons should keep every reasonable accounting documents and records of all business supplies and acquisitions to enable GST auditors to establish the nature, time and value of all taxable supplies and importation of goods and services, including information which assists in reconciling accounting records with the GST returns submitted.

52. Details of any exempt supplies and any method of apportionment used should also be available. The term “records” therefore include the record of all goods and services supplied, received and imported and the applicable rate of tax on all supplies made and received. The specific records that you are required to keep include:
(a) Business Entity Records

Business registration records such as Form 9, Form 13, Form 24 or Form 49.

(b) Taxation Records

(i) GST returns, payment slips and receipts;

(ii) Export release records, such as exports declaration (K2), records for the taxable goods status and other related records.

(iii) Import release records such as:

- imports declaration (K1, K9), Customs Official Receipt (COR) and value declaration form (K1A);
- transportation records such as invoices, delivery orders, packing lists, bill of lading, insurance records, transport charges and other related records;
- Letter/Classification Ruling or Decision/Valuation Ruling or Customs Advance Ruling;
- exemption letters obtained by the registered person; and
- Import Permit;

(iv) Records and documents to account for any adjustments related to GST input and output tax;

(v) Inland Revenue declaration forms;

(vi) GST Summary Sheet;

(vii) GST adjustment working sheet.

(c) Business Transactions Records

(i) Sale and purchase records such as purchase order/order notes, delivery orders, tax invoices, invoices, receipts, vouchers, cash register roll, debit/credit notes and other related records.

(ii) Contract records (includes sub-contracts) such as agreements between buyers and sellers or parties involved in business

(iii) Correspondence records such as mail, facsimile, e-mail and other related documents.

(iv) Payment records such as cheques, bank drafts, letter of credit, fund transfers applications, debit advice and other related records.

(v) Details of any agents acting on supplier/principal’s behalf and transactions concluded through agents.

(d) Accounting Records

(ii) Management Account.

(iii) General Ledger and Subsidiary Ledger

(iv) Cash Book

(v) Fixed Asset Register

(vi) Production records, stock sheet/list and control list;

(vii) Debtors and creditors lists (in respect of a change in accounting basis)

(viii) Audit adjustments

(ix) Journal, acceptance slips, receipts, payment vouchers, payment slips and other supporting records.

(e) Other records:

(i) business goods which were put to non-business use;

(ii) disposal of business goods, whether or not for a consideration;

(iii) gifts to customers in the course or furtherance of business;
(iv) samples given to potential customers in the course or furtherance of business;

(v) fringe benefits given to employees; and

(vi) movement of imported goods to/from Licensed Warehouse.

You may require the above information when calculating your GST liability before filling in your GST return.

**Computer/Electronic Records**

53. The registered person must keep the original documentation which is normally kept in paper (hard copy) format. However, where the record is in an electronically readable form, the record shall be kept in such manner as to enable the record to be readily accessible and convertible into writing.

54. When the record is originally in a manual form and is subsequently converted into an electronic record, the record shall be retained in its original form prior to the conversion. Such records shall be admissible as evidence in any proceedings. For example, records kept in a computer using magnetic tape or disc, should be readily converted into a satisfactory legible form and available to Customs on request to allow its officers to check registered person’s operation and the information stored through the person in charge of the computer or its software.

**Records Kept Overseas**

55. Any record relating to GST must be kept in Malaysia by taxable persons. For those who intend to keep their records overseas, they must seek approval from the Director General, subject to the conditions as he deems fit. Besides complying with Section 36 of the GST Act 2014, records kept overseas must be made available when required by the GST officers for verification or audit purposes.

**RECORDS ON GST SUMMARY SHEET**

56. To facilitate you to submit correct and accurate GST returns and to assist any audit process, it is advisable that you maintain a record on GST summary sheet.
GST summary sheet is a summary of the value of acquisition/supply and input/output tax for each taxable period.

57. For every taxable period, you should update your records and prepare your GST summary sheet with separate headings as follows:

   (a) Total Acquisition and Input Tax
   (b) Total Supply and Output tax
   (c) Additional Information

Examples of a GST summary sheet are as in Figures 15, 16 and 17.

58. GST summary sheet as in Figures 15, 16 and 17 is the basic requirement to record your GST information. An additional working sheet is required to support this summary sheet. For example, you as a GST registered supplier may be required to prepare an additional working sheet to support the figures in Credit Note / Debit Note as recorded in Figure 15. Example of the working sheet is as in Figure 18.

**RECORDS REQUIREMENTS TO CLAIM GST RELIEF ON BAD DEBTS**

59. Taxable persons are required to maintain and preserve all records and documents in respect of bad debts. Besides the records mentioned in paragraph 47
to 55 of this guide, the taxable person is required to keep additional records to support bad debt relief claims such as:

(a) other documentary evidence showing the time, nature, purchaser’s details and the consideration of the supply;

(b) records or any other documents showing that you have accounted for and paid the tax;

(c) records or any other documents, for example debtor’s aging list showing that the consideration has not been received after 6 months from the date of supply and accounted as bad debt in the taxable person’s accounts;

(d) records or any other documents showing that sufficient efforts have been taken by the registered person to recover the debt. Sufficient efforts may include:

(i) letters of demand or reminder from company; or  
(ii) letter from company’s solicitor or legal action taken against the debtor if any; or  
(iii) engagement and actions from credit agency if any; or  
(iv) bad debt has been written off in the company’s account and etc.

It is not compulsory to fulfil all the conditions above. However, merely sending letters of demand to debtors may not be treated as sufficient efforts to recover the debt. Thus, Customs may not qualify the taxable person for bad debt relief.

(e) insolvency records such as:

(i) Individual:  
A letter from Department of Insolvency to notify that the debtor is declared as adjudged bankrupt under the Bankruptcy Act 1967;

(ii) Company:  
- letter from Department of Insolvency; or  
- court order for winding up under Companies Act 1965;
• letter of appointment of receiver;
• statement of affairs lodged with Suruhanjaya Syarikat Malaysia to state that the assets of the company is not sufficient to cover the payment of any debts; and
• forms related to debtor’s insolvency such as:
  ➢ Form 70, Companies Act 1965 (Notice of Appointment and Situation of Office or Liquidator (Winding-Up) by the Court);
  ➢ Form 75, Companies Act 1965 (Liquidator’s Account of Receipts and Payments and Statement of the Position in the Winding Up);
  ➢ Proof of Debt (General Form);

(f) maintain a single account known as “refund for bad debts account”.

60. A record should also be maintained showing details of supply in respect of each claim made:

(a) details of supply for that claim;
   (i) the amount of GST chargeable;
   (ii) the taxable period in which the GST was accounted for and paid to the Director General;
   (iii) the date and serial number of tax invoice issued or, where there is no such invoice, any information necessary to identify the time, nature and debtor; and
   (iv) any payment received.
(b) the outstanding GST amount to which the claim relates;
(c) the total amount of GST claim; and
(d) the taxable period in which the claim was made.

Example is shown in Figure 19.

</tr>
</tbody>
</table>

**TOTAL** 9,400.00 532.08 390.00 9,010.00 510.00

The above example is using invoice as reference. However, if the time of supply is not based on the date of invoice, the reference could be the date of delivery or payment, whichever is applicable.

**NON-ISSUANCE OF TAX INVOICE AND RECORD KEEPING**

61. Under GST legislations, the general rule is that a registered person who makes taxable supplies must issue a tax invoice. However, under certain circumstances, a registered person may impose GST on his supply without issuing a tax invoice.

**GST Registered Person Under Relief for Second Hand Goods**

62. A person approved under this scheme can purchase second-hand goods (used motor vehicles/real properties) from a non-registered person or individual. Subsequently, when the person approved under this scheme resells the goods, he has to charge GST on the difference between the selling price and acquisition price of the goods. Since tax invoice is not allowed to be issued by the approved person,
the buyer if he is a registered person cannot claim input tax on such goods (for further information, please refer to the Guide on Margin Scheme).

63. A person approved under this scheme must keep records such as:

   (a) purchase and sales invoices for sales under the Margin Scheme;
   
   (b) log book; and
   
   (c) payment voucher.

64. The log book should include the following details:

   (a) Purchase Details
       
       (i) date of acquisition / purchase;
       
       (ii) purchase invoice number;
       
       (iii) total purchase price;
       
       (iv) seller’s name and address;
       
       (v) property (commercial building)/vehicle registration, engine and chassis numbers; and
       
       (vi) model and make.

   (b) Sales Details
       
       (i) date of sale;
       
       (ii) sales invoice number;
       
       (iii) buyer’s name and address;
       
       (iv) total sale price;
       
       (v) property (commercial building)/vehicle registration, engine and chassis numbers; and
       
       (vi) model and make.

   (c) Accounting Details
       
       (i) purchase price;
       
       (ii) selling price;
(iii) sales margin value;
(iv) tax rate on date of sale; and
(v) GST due.

Example of a margin scheme record is as in Figure 20.

**Flat Rate Scheme**

65. Flat rate scheme allows any person who qualifies and is carrying on a business involving the prescribed activities to include a prescribed flat rate addition in the consideration for any taxable supply of goods made by him from the prescribed activities to any registered person in the course or furtherance of the business.

66. The approved person of prescribed activities shall issue an invoice and charge a prescribed flat rate addition in the consideration on the supply of taxable goods to GST registered persons. Example of an invoice issued by approved person is shown in Figure 21.

67. Besides the issuance of invoice by the approved person, the Director General may, upon application by the registered person, allow him to issue an invoice in relation to a supply made by the approved person subject to the following conditions:

   (a) the value is not known by the approved person at the time of making the supply;
(b) the registered person and the approved person agree in writing that the approved person shall not issue an invoice in respect of any supply made under this scheme;

(c) the registered person shall issue an invoice showing the particulars stated under paragraph 69 of this guide;

(d) a copy of the invoice is to be provided to the approved person and a copy is to be retained by the registered person;

(e) the approved person shall notify the registered person if he ceases business, transfers his business as a going concern or becomes a registered person;

(f) in the case where the invoice is issued before the supply is made, the invoice shall be issued with payments; and

(g) any other conditions as the Director General deems fit to impose.

Example of an invoice issued by a registered person (recipient) is shown in Figure 22.

68. The approved persons under the scheme are not allowed to claim ITC and buyers who are GST registered persons can claim ITC based on flat rate addition (tax) incurred. The approved persons need not submit returns nor remit flat-rate addition (tax) collected to Customs. However, he must submit annual sales statement which includes the customers list to the Director General. Example of flat rate scheme annual sales statement is shown in Table 1 below.

Position : 

Company’s Stamp : 
69. An invoice issued under the scheme should have the following particulars:

(a) invoice serial number;
(b) the name, address and reference number of the approved person;
(c) the date of issuance of the invoice;
(d) the name, address and GST identification number of the registered person to whom the goods are supplied;
(e) a description of the goods supplied;
(f) the total amount payable excluding flat rate addition, the rate of flat rate addition and the total amount of flat rate addition to be shown separately; and
(g) the total amount payable inclusive of flat rate addition.

70. An approved person shall only issue an invoice with a flat rate addition for any supply of taxable goods to GST registered person with respect to the prescribed activities of his business.

Records to Keep

71. Records to be kept under flat rate scheme include:

(a) invoices;

(b) sales record:
   (i) of total sales to GST registered person with flat rate addition; and
   (ii) total non-farming activities; and

(c) annual sales statement

Approved Toll Manufacturing Scheme (ATMS)

72. A toll/contract manufacturer performing value added activities involving the treatment or processing of goods for an overseas principal, can apply for the ATMS as an Approved Toll Manufacturer subject to certain prescribed conditions (Please refer to GST Guide on ATMS).

73. Under the ATMS, the supply of value added activities (such as processing charges/toll) made by the Approved Toll Manufacturer (ATM) for and to the overseas principal is to be disregarded under section 72(1) of the GST Act 2014. GST on the processed goods or finished goods delivered by the ATM (for his overseas principal) to a local customer (GST registered person or non-GST registered person) will be accounted by the local customer by way of “Recipient Accounting”, i.e. the local customer shall account and pay tax as if he had himself supply the goods.

Invoice for the ATMS

74. ATM may issue a tax invoice to overseas principal for the supply of value added services performed on the raw materials consigned by the overseas principal. Tax invoice should not be issued for processed or finished goods delivered to local customer of overseas principal. However, such goods delivered by ATM to that local customer should be accompanied by Delivery Order (DO).

75. The local customer/recipient who received such goods will account for output tax on the local supply by way of “Recipient Self-Accounting” based on invoices from
the overseas principal or when payment is made to the overseas principal. At the same time, the local customer can claim the deemed output tax as his input tax credit if he is a GST registered person.

76. However if the local customer (who is also a GST registered person) received processed or finished goods from the ATM and subsequently supplied the goods to the local markets, he should account for output tax and must issue tax invoice to the buyers on such local supplies.

**Record Keeping**

77. Both the approved toll manufacturer and the local customer (ATMS participant) of the overseas client who are registered under the ATMS must maintain up-to-date accounts and records at all times.

(a) Record Keeping by Approved Toll Manufacturer

Besides the records mentioned in paragraphs 47 to 55 of this guide, a toll manufacturer under the ATMS must at all times maintain and preserve good accounting and inventory records related to raw materials received, stored and being manufactured as well as processed or finished goods delivered and re-exported. These records include:

(i) all invoices from and to overseas principal;

(ii) delivery orders;

(iii) other original documents and records related to the acquisitions, receipts and supplies of raw materials (imported or local purchase) and finished goods re-exported, delivered or consigned under the ATMS;

(iv) any agreements or contracts made between the Approved Toll Manufacturer and the overseas principal;

(v) list of recipients covered under ATMS (registered and non-registered); and
(vi) summary of delivery of goods to ATMS recipients (registered and non-registered).

(b) Record Keeping by Local Customer (registered and non-registered)

The local customer under the ATMS must similarly maintain and preserve good accounting and inventory records at all times with respect to finished goods received and supplied, both locally and overseas. These records include:

(i) all invoices from overseas principal;
(ii) payment records to overseas principal;
(iii) delivery orders from ATM;
(iv) other original documents and records related to supplies received and sold such as Customs Declaration Forms (K1/K2/K9) etc.; and
(v) any agreements or contracts between local customer (buyer of finished product) and the overseas principal.

GST Group Registration

78. Companies that form a group may choose to be registered as a group under GST. Two or more companies may group under GST when one company controls the other(s) or when these companies are controlled by an individual or a few individuals in a partnership. The controlling person(s) must hold more than fifty percent of the issued share capital of each of these companies (For more details, please refer to the GST Guide on Registration).

Invoice for GST Group

79. The issuance of invoices by registered persons under group registration are as follows:

(a) Individual member of the GST group making supplies to recipients outside the group must issue tax invoices with their own GST registration numbers.
(b) For acquisitions by individual member of the GST group from suppliers outside the group, the tax invoice shall be issued in the name of the individual members.

(c) Supplies or transactions between members of the GST group are disregarded. They may issue normal invoices to one another when making supplies within the group.

**Records to Keep**

80. Besides the documents and records mentioned in paragraphs 47 to 55 of this guide that are required to be maintained by the registered persons, all members of GST group including the representative member shall also maintain the following records:

(a) individual member’s monthly record on total inputs (purchases and acquisitions) and outputs (sales and disposal other than sales); and

(b) individual member’s monthly summary on total inputs (purchases and acquisitions) and outputs (sales and disposal other than sales).

Examples of such monthly summary are shown in the following examples:

(Output Tax – Input Tax)
Joint Venture

82. A Joint Venture formed to undertake petroleum upstream activity under the Production Sharing Contract (PSC) is approved for registration under GST joint venture (For more information, please refer to the GST Guide on Petroleum Upstream Activities).

Records to Keep

83. The Venture Operator and the Venturers are required to maintain their respective records as follows:

(a) The Venture Operator:
   (i) Production Sharing Contract, Joint Operating Agreement, Budget and Work Programs and other related documents for the joint venture;
   (ii) purchase and sales invoices in the name of the venture operator for the joint venture. Other related documentary evidences of such purchases or acquisitions and sales;
   (iii) joint interest billings issued to all venturers; and
   (iv) monthly quantity records of crude petroleum or raw gas being uplifted from oil or gas wells by the respective venturers.

(b) The Venturers:
   (i) tax invoices on the supply of goods and services to the venture operator with respect to the JV. Documentary evidences of such supply to the venture operator. (The venturer can claim input tax on acquisitions made by him for the JV); and
   (ii) tax invoices on the supply of crude petroleum or raw gas being uplifted from oil or gas wells. (The venturer is to account and pay for the output tax [GST] on the supply of such goods to his customers).

OTHER CASES
84. Other cases on issuance of tax invoice and record keeping include:

Agents

85. An agent may buy or sell goods and services on behalf of a principal either in the name of the principal or in his own name.

86. If an agent sells goods and services on behalf of the principal, the principal is the seller and not the agent. In such a case, an agent should not issue a tax invoice in his own name to the buyer. However, in certain cases, an agent is allowed to issue tax invoice on behalf of the principal provided that it is issued in the name of the principal.

87. If an agent buys goods and services on behalf of the principal, the principal is the buyer and not the agent. In such a case, the tax invoice must show the principal’s details, i.e. the tax invoice should be issued to the principal.

88. In the case of an agent who buys or sells goods and services in his own name, he is the buyer or the seller. If the agent is a registered person, he must issue a tax invoice in his own name.

89. If the agent is a registered person, he must issue a tax invoice to claim the commission from the principal for his services as a selling or buying agent. (For further information, please refer to the GST Guide on Agent).

Record Keeping

90. Besides the records mentioned in paragraph 47 to 55 of this guide, the agent must also keep a complete record of the name, address and GST number of his principals in any transaction.

Auctioneer

91. In an auction sale, the auctioneer normally acts as an agent to sell goods on behalf of the principal. Principal may include owner or financier. Although the goods will be auctioned on behalf of the principal, the auctioneer has to account for output tax for the sale of the goods if the owner is a taxable person. Invoice for the supply of the auctioned goods will also be issued by the auctioneer.
92. The types of billing document or invoice to be issued to the buyer of the auctioned goods will depend on the GST status of the owner of the goods. If the owner of the goods is a taxable person, the auctioneer whether or not he is a registered person has to issue an invoice or a statement of sales (deemed tax invoice) as mentioned in paragraph 28 of this guide. Summary of the above scenario is as follows:

**Figure 23: Summary of Types of Invoice Issued by Auctioneer to buyer of auctioned goods**

<table>
<thead>
<tr>
<th>SCENARIO</th>
<th>STATUS OF OWNER</th>
<th>OUTPUT TAX</th>
<th>AUCTIONEER</th>
<th>TYPES OF INVOICE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Taxable Person</td>
<td>Chargeable</td>
<td>Registered Person</td>
<td>Deemed Tax Invoice Issued by auctioneer</td>
</tr>
<tr>
<td>2</td>
<td>Taxable Person</td>

</tr>
<tr>
<td>3</td>
<td>Non-Taxable Person</td>
<td>Not Chargeable</td>
<td>Registered Person</td>
<td>Invoice</td>
</tr>
<tr>
<td>4</td>
<td>Non-Taxable Person</td>
<td>Not Chargeable</td>
<td>Non-Registered Person</td>
<td>Invoice</td>
</tr>
</tbody>
</table>

93. The services rendered by the auctioneer are taxable supplies, thus commissions earned by the auctioneer would be liable for output tax. If the auctioneer is a registered person, then he has to issue a tax invoice to claim his commission or fee from the principal for carrying out the auction. (For more information, please refer to the GST Guide on Auctioneer).

**Record Keeping**

94. An auctioneer, whether or not he is a taxable person, must maintain and keep proper records to account for all goods that he received and auctioned off on behalf of his principals who are taxable persons for at least seven years. All accounting records must be supported by related original documents and must be kept in accordance with the Generally Accepted Accounting Principles (GAAP) and provides a good audit trail. Records to be maintained by the auctioneer include:
(a) the names, addresses and GST number of the principals in any transaction;
(b) date of sale;
(c) quantity and description of each goods or property that he auctioned on behalf of each individual principal;
(d) the auctioned price of each goods or property that he has auctioned off;
(e) entry fee or commission he receives for each goods or property that he has auctioned off;
(f) charges on incidental services provided to each individual principal; and
(g) details of output tax charged and input tax claimed.

Repossession of Goods by Lender/Financier

95. Repossession is generally used to refer to lender or financier taking back the asset/property/goods that were either used as collateral or rented or leased in a transaction. The hirer is the person who initially owns the property or goods which were later taken back by the lender or financier when he defaulted on his payment. The act of repossession is not a supply for GST purposes. When the repossessor (i.e. the person or institution which provides the financing and later repossessed the property or goods to recover the loan) sells the property or goods, he is deemed to have sold the goods on behalf of the hirer and has to account for any output tax on the sale of the repossessed goods if the hirer is a registered person. Invoice for the supply of the repossessed goods will also be issued by the repossessor.

96. The mechanism on the issuance of invoice is the same as the auctioneer in paragraphs 91 to 94 of this guide. The repossessor, whether he is a GST registered person or not, has to issue a billing document on a tax inclusive principle if the hirer of the property or goods is a GST registered person.

97. Usually, the lender/financier may contract the work of repossession out to a repossession agent. The agent will then surrender the goods to the lender or financier. The services performed by repossession agent are taxable supplies. If the agent is a registered person, he must issue a tax invoice to claim the commission from the
lender/financier for his services as repossession agent (For further information, please refer to the GST Guide on Repossessed Goods).

98. The lender/financier may also appoint an auctioneer to auction the property or goods on his behalf (Please refer to paragraphs 91 to 94 of the guide).

**Example 21**

*In a hire purchase case where the buyer (GST registered person) has defaulted on his payment, the lender/financier engaged a repossession agent (GST registered person) to take back the goods from the buyer. When the lender/financier sold off the goods, he is deemed to have sold the goods on behalf of the hirer (the buyer or the initial owner of the goods) and has to issue a statement of sales or invoice on a tax inclusive principle to the purchaser of the repossessed goods and account for output tax. Since the agent is a registered person, he has to issue a tax invoice to the financier for services rendered as a repossession.*

**Record Keeping**

99. The repossession (lender/financier) or repossession agent who is a taxable or GST registered person must maintain and preserve proper accounting records and documents (including tax invoice) on all goods that he repossessed for at least 7 years in accordance with the GST Act 2014. In addition, the records should also include the following details:

(a) the names, addresses and GST number of the persons (hirers) whose goods were sold;

(b) quantity and description of goods or properties that he repossessed;

(c) the date the goods or properties were repossessed;

(d) the date the repossessed goods were sold;

(e) the descriptions and quantity of goods sold and the rate of tax chargeable;

(f) the amount for which they were sold and the amount of tax charged; and

(g) incidental expenses incurred in the repossession of goods.
Replaced Goods

100. Replaced goods for the purpose of GST may involve the following situations:

(a) Situation 1 – No Additional Charge

If you replace returned goods with similar goods, you may either:

(i) Let the original GST stands;

You need not account for GST on the replaced goods provided they are supplied free of charge.

Example 22

Ali bought a book from ABC Book Mart Sdn. Bhd. on 03.06.2015. He returned the next day complaining of some missing pages. The seller agreed to replace the book with a new one without additional charges. In this case, the seller need not account for GST on the replaced book as there is no additional charge.

OR

(ii) If the seller decides to issue a credit note to cover the returned goods and issue a new tax invoice for the replaced goods.

Example 23

Ali bought a book from ABC Book Mart Sdn. Bhd. on 03.06.2015. He returned the next day complaining he was given the wrong edition. The seller agreed to replace the book with the right edition without additional charges. The seller issued a credit note for the wrong edition book and raised a new tax invoice for the replaced book. In this case, the seller need not account for GST on the replaced book as there is no additional charge.

(b) Situation 2 – Reduced or Additional Charges

If the replaced goods are supplied at a lower price than the original goods, the seller may issue a credit note to account for the GST
adjustment. On the other hand, if they are supplied at a higher price, the seller may issue a debit note to account for the additional GST.

**Example 24**

Ali bought a paperback novel from ABC Book Mart Sdn. Bhd. on 03.06.2015. He returned the next day, requesting to replace it with hardcover edition. The hardcover novel incurred additional charge of RM30.00. The seller may issue a debit note of RM30.00 and account for the GST. This debit note should make reference to the earlier invoice issued.

**Employee Benefits**

101. An employee benefit is a benefit given to an employee or an associate of employees (e.g. spouse and children). It may include any right, privilege, service or facility provided free of charge to employees. (For more details, please refer to GST Guide on Employee Benefits).

102. Goods or services acquired and given as employee benefits including zero-rated goods and benefits that are subject to the RM500.00 gift rule are considered as used for business purposes and the taxable person can claim input tax incurred on the acquisition except exempted and disallowed input tax supplies.

**Tax Invoice for Input Tax Claim on Employee Benefits**

103. Since employee benefits are considered as supplied for GST purposes, thus any input tax incurred in acquisition of such goods or services can be claimed as input tax credit provided there is a tax invoice on the acquisition and the tax invoice must be addressed to the employer. If the tax invoice is addressed to the employee, input tax cannot be claimed.

**Example 25**

Hassan, a manager of a GST registered company acquired taxable goods from a GST registered retailer. The tax invoice for the supply of these goods which were to be given as employee benefits to the company’s staff was addressed to Hassan. Input tax cannot be claimed as the tax invoice should be addressed to his employer, the GST registered company and not Hassan, the employee.
Do I need to issue a tax invoice on goods or services given to my staff as employee benefits?

104. Basically, all services given free to your staff as employee benefits are not subject to GST and therefore, tax invoice need not be issued. However, goods given to your employee as employee benefits for purposes other than business are subject to GST if the value of the goods is more than RM500 but you have an option whether to give or not the tax invoice and you have to account for the output tax.

Records to Keep

105. A registered person or taxable person is required to maintain complete and up to date documents such as commercial invoices, tax invoices, vouchers, employment records and any document related to fringe benefits given to employees. It must be made available to the Director General upon request and these records must also be kept for seven years.

FREQUENTLY ASKED QUESTIONS

Q1. I am a GST registered person and make both standard rated and exempt supply to my customer. Can I issue one tax invoice for both supplies?

A1. You can issue one tax invoice if the transaction involves both taxable and non-taxable (exempt or out of scope supply). However, you must have indicators to distinguish the different types of supply in the tax invoice.

Q2. I am a GST registered mixed supplier making standard rated supply and exempt supply. Can I issue a tax invoice for a transaction which is a wholly exempt supply?

A2. If a transaction involves wholly non-taxable supplies e.g. exempt supplies, then you have to issue a normal invoice. In this case your company needs to have two (2) set of serial numbers i.e., one set for tax invoices and another set for the normal invoices.

Q3. We are allowed to issue tax invoice in foreign currency and required to convert to Ringgit Malaysia. Do we need to convert to Ringgit Malaysia
each item showed on the tax invoice? Will it be sufficient to convert the total amount (excluding GST) in Ringgit Malaysia?

A3. No, converting the total amount (excluding GST) in Ringgit Malaysia is not sufficient. The following items on the tax invoice must be converted into Ringgit Malaysia for GST purpose:

1. Total amount payable (excluding GST)
2. Total tax chargeable, and
3. Total amount payable (including GST)

Q4. I am a registered second hand car dealer and also given approval under the margin scheme. In such a situation, is it true that I cannot issue a tax invoice for my sale of second hand cars?

A4. Second hand car dealer must not issue tax invoice for supply of second hand car under the Margin Scheme (issue normal invoice). However, if you supply the second hand car as a registered person (not using Margin Scheme), then you must issue a tax invoice and charge GST 6%.

Q5. Do I need to convert foreign currency to Ringgit Malaysia in the tax invoice for goods that are exported?

A5. It is not necessary to convert foreign currency to Ringgit Malaysia in the tax invoice that are issued to overseas customers.

Q6. Approved person under Flat Rate Scheme (FRS) must submit annual sales statement. Does this annual sales based on calendar year or financial year?

A6. The annual sales should be based on calendar year.

Q7. Do I need to issue tax invoice for deposit or part payment if it is part of the consideration?

A7. Yes, you have to issue a tax invoice.

Q8. With reference to question no.7, can I claim input tax for deposit or part payment made?

A8. Yes, you can claim input tax on deposit or part payment made provided a tax invoice has been issued.
Q9. Is the service charge stated in my hotel's bill subject to GST?

A9. Service charge is a charge for the supply of services by the hotel. Therefore, it is subject to GST.

Q10. I maintain an approved simplified tax invoice book (without customer's name and address) which is hand written for my sales. What should I do when my customer request to insert his name and address to enable him to claim full input tax which is more than RM30?

A10. Your approved simplified tax invoice book must have pre-printed particulars as approved by the Director General. You should only fill up the date, description of the goods, quantity, GST rate and price. In the event your customer request to insert his name and address (if not stated in the invoice) for the purpose of claiming full input tax, then the additions should be done by the supplier on both the supplier and customer's copy (carbonized).

Q11. I have been approved to issue self-billed invoice on behalf of my suppliers. I have such billing arrangements with five (5) suppliers. Can I maintain five (5) different sets of serial numbers for each supplier?

A11. Yes, you have to maintain different sets of serial numbers for each supplier when you issue the self-billed invoice.

Q12. What exchange rate should I use for my payment on supply of imported services (reverse charge mechanism) and supply of goods (recipient accounting) under Approved Toll Manufacturer Scheme?

A12. You should use the daily selling rates of exchange prevailing in Malaysia.

Q13. Can I use credit notes to make contra payments with my customer who is also my supplier?

A13. If you are a GST registered person, you cannot issue a credit note to make contra payment. For the purpose of GST, credit note is issued if there is a change in consideration after a tax invoice has been issued for the respective supply. Contra payment does not involve a change in consideration that has been invoiced. You may issue other documents such as credit memo, remittance advice, voucher and etc. for the purpose of contra payment.
Q14. I rent a business premise and pay utility bills such as electricity and water. Can I claim input tax credit if the bill is in the name of my landlord who is a GST registered person?

A14. You cannot claim the input tax since the bill is in the name of the landlord. To enable you to claim the input tax, the bill has to be in your name.

Q15. Referring to examples of tax invoices in Figure 2, 3, 7 & 8 of the Tax Invoice and Record Keeping guide, is it compulsory to state the GST summary in the tax invoice?

A15. It is not compulsory. However, for Figure 7 & 8, if you have been approved by the Director General to issue a tax inclusive simplified tax invoice, then you have to state the amount of GST charged.
