- (vi) Berdasarkan keterangan dan fakta di atas, barangan sesuai diklasifikasikan di bawah *heading 73.08* dan menepati keterangan di bawah *heading 73.08 to Chapter 73* di dalam EN HS 2017 muka surat VII-7308-1 seperti berikut :

73.08 ***Structures (excluding prefabricated buildings of heading 94.06) and parts of structures (for example, bridges and bridge-sections, lock-gates, towers, lattice masts, roofs, roofing frame-works, doors and windows and their frames and thresholds for doors, shutters, balustrades, pillars and columns), of iron or steel; plates, rods, angles, shapes, sections, tubes and the like, prepared for use in structures, of iron or steel.***

7308.10 - *Bridges and bridge-sections*

7308.20 - *Towers and lattice masts*

7308.30 - *Doors, windows and their frames and thresholds for doors*

7308.40 - *Equipment for scaffolding, shuttering, propping or pit-propping*

7308.90 - ***Other***

This heading covers **complete or incomplete metal structures**, as well as **parts of structures**. For the purpose of this heading, these structures are characterised by the fact that once **they are put in position**, they generally remain in that position. They are usually made up from bars, rods, **tubes**, angles, shapes, sections, sheets, plates, wide flats including so-called universal plates, hoop, strip, forgings or castings, by riveting, bolting, welding, etc. Such structures sometimes incorporate products of other headings such as panels of woven wire or expanded metal of heading 73.14. Parts of structures **include clamps and other devices specially designed for assembling metal structural elements of round cross-section** (tubular or other). These devices usually have protuberances with tapped holes in which screws are inserted, at the time of assembly, to fix the clamps to the tubing.
