(B) Washing preparations (including auxiliary washing preparations) and cleaning preparations, having a basis of soap or other organic surface-active agents.

This category covers washing preparations, auxiliary washing preparations and certain cleaning preparations. These various preparations generally contain essential constituents and one or more subsidiary constituents. The presence of these latter constituents distinguishes, in particular, these preparations from those described in Part (A) above.

The essential constituents are synthetic organic surface-active agents or soaps or mixtures thereof.

The subsidiary constituents are:

(1) Builders (e.g., sodium polyphosphates, carbonates, silicate or borate, salts of nitrilotriacetic acid (NT A»).

(2) Boosters (e.g., alkanolamides, fatty acid amides, fatty amine oxides).

(3) Fillers (e.g., sodium sulphate or chloride).

(4) Ancillaries (e.g., chemical or optical bleaches, antiredeposition agents, corrosion inhibitors, antielectrostatic agents, colouring matter, perfumes, bactericides, enzymes).

These preparations act on surfaces by bringing the soil on the surface into a state of solution or dispersion.

Washing preparations based on surface-active agents are also known as detergents. This type of preparation is used for washing clothes and also dishes or kitchen utensil.

They may be liquids, powders or pastes and are used for household or industrial purposes. Toilet and wasliing products in the form of bars, cakes, moulded pieces or shapes fall in heading 34.01.

Auxiliary washing preparations are used for soaking (pre-washing), rinsing or bleaching clothes, household linen, etc.

Cleaning preparations serve for cleaning floors, windows or other surfaces. They may also contain small quantities of odoriferous substances.

Berdasarkan keterangan di atas, barangan tidak sesuai diklasifikasikan di bawah kod tarif **3402.20.14 00** sebagai *Surface Active Preparations* kerana kod tarif ini adalah hanya sesuai ke atas *Surface Active Preparations* yang tidak mempunyai fungsi/kegunaan yang dinyatakan secara spesifik sebagai contoh ia akan digunakan untuk membuat barangan ini (*intermediate product*).
