*Subject to Note 1 (d) to Chapter 85, this heading covers vacuum cleaners of all kinds, whether or not hand-held, including dry and wet vacuum cleaners, whether or not presented with accessories such as rotary brushes, carpet beating devices, multiple-function suction heads, etc.*

*Vacuum cleaners perform two functions : the suction of material, including dust, and the filtering of the air stream. Suction is effected by means of a turbine fixed directly onto the shaft of the motor, turning at high velocity. The dust and other material are collected in an internal or external dust bag or other receptacle, whereas the air sucked in and filtered is also used to cool the motor.*
