Ketetapan:

Ketua Pengarah Kastam Malaysia memutuskan barangan ini sesuai diperjeniskan di bawah kod tarif **5906.99 000 (PDK 2012) / 5906.99 1000 (PDK 2017)** sebagai **Rubberised Textile Fabrics** berdasarkan alasan-alasan berikut:

Barangan tidak sesuai diklasifikasikan di bawah heading **40.08** disebabkan berat (g/m²) barangan ini lebih menepati maksud **Chapter 59** berdasarkan EN HS 2012 muka surat XI-5906-1 seperti mana yang berikut:

This heading covers :

(A) *Textile fabrics impregnated, coated, covered or laminated with rubber, including dipped fabrics (other than those of heading 59.02), of a weight :*

(1) not exceeding 1,500 g/m², irrespective of the proportions of textile and rubber; or

(2) if exceeding 1,500 g/m², containing more than 50% by weight of textile material

These rubberised fabrics are used principally for the manufacture of waterproof apparel, special radiation protection garments, pneumatic articles, camping equipment, sanitary goods, etc.

Certain upholstery fabrics, lightly coated on one side with rubber latex, are not necessarily waterproof but nevertheless remain in this heading.

These fabrics should not be confused with fabrics assembled in layers with rubber adhesives, such as those used for coachwork or for footwear. A cross-section of these latter fabrics shows no thickness of rubber and they normally fall in Chapters 50 to 55.

Keterangan dalam EN ini menjelaskan bahawa *Textiles Fabrics Coated with rubber* termasuk di dalam heading **59.06** jika beratnya tidak melebihi 1500 g/m². Disebabkan berat barangan adalah 699 g/m², maka ianya menepati maksud EN heading yang tersebut.

Berdasarkan keterangan dan fakta diatas, barangan sesuai diperjeniskan dibawah subheading **5902.99** yang mendapat liputan secara khusus berdasarkan Perintah Duti Kastam (PDK 2012) seperti berikut :

59.06 - Rubberised textile fabrics, other than those of heading 59.02.

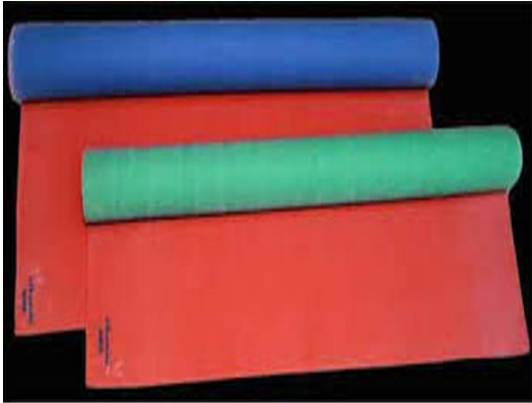

5906.10 000 - Adhesive tape of a width not exceeding 20 cm

- Other:

5906.91 000 - - Knitted or crocheted

5906.99 000 - - Other
