

Dagangan : NON-REFILLABLE POCKET LIGHTER	Kod Tarif (Perintah Duti Kastam 2012) : 9613.10 100
Jenama : BIC	Tarikh Kelulusan : 10 Oktober 2016
Model : J3 Slim Classic Opaque AST TY50BC	

Keterangan barangan :

Barangan merupakan sejenis non-refillable pocket lighter digunakan untuk menghasilkan nyalaan api. Barangan juga dikategorikan sebagai *non-child resistant, non adjustable* dan *non-refillable*. Manakala *flint ignition* pula dihasilkan dengan cara *post mixing* (selepas spark dan gas bercampur) dan *self extinguishing* dengan menggunakan *liquid gas fuel*.

Fungsi barangan adalah sebagai *flame producing device* **mostly used** to ignite cigarettes, cigars or pipes.

Barangan berbentuk silinder dengan bahagian body diperbuat daripada bahan plastik, berukuran 7.56 x 2.16 x 1.07 cm (tinggi x panjang x lebar).

Gambar barangan adalah seperti berikut:

Ciri-ciri lain barangan adalah seperti berikut:

Raw materials	Components	
<p>Delrin polyoxymethylene (POM)</p> <p>Colorant (POM)</p> <p>Nylon (PA)</p> <p>Colorant (PA)</p> <p>Polystyrene (PS)</p> <p>Colorant (PS)</p> <p>Spring wire</p>	 <p>Hood <i>Steel. Windshield and heat protection.</i></p>  <p>Jet <i>With Jet and Fork Spring these components control the opening and closing of gas coming from the valve. Releasing the fork automatically stops the flow of gas from the valve. The</i></p>  <p>Fork <i>With Fork and Fork Spring these components control the opening and closing of gas coming from the valve.</i></p>  <p>Sparkwheel <i>When the sparkwheel, which is made of serrated hardened steel wire, is rotated with sufficient speed and force, it creates a spark.</i></p>  <p>Body <i>This is plastic; ultrasonically welded with the Base. The body, base and seal ball constitute the gas reservoir.</i></p>  <p>Flint <i>Supplies material for the sparks. The flint spring applies pressure to the flint to generate sparks.</i></p>  <p>Fork Spring <i>With Jet and Fork these components control the opening and closing of gas coming from the valve.</i></p>	 <p>The Lighter <i>Roll-over and click a part of the Maxi pocket lighter to learn more!</i></p>  <p>Ball <i>Seals the gas reservoir after it is filled.</i></p>  <p>Guard <i>Safety guard added over the sparkwheel on all BIC child-resistant lighters</i></p>  <p>Base <i>This is plastic; ultrasonically welded with the Body. The body, base and seal ball constitute the gas reservoir.</i></p>  <p>Valve <i>The subassembly regulates fuel flow and es a constant level of fuel, permitting a nt flame of predetermined height.</i></p>  <p>Flint Spring <i>Feeds flint onto sparkwheel as flint wears. The flint spring applies pressure to the flint to generate sparks.</i></p>

Lighter ini menggunakan isobutane gas sebagai bahan bakar.

Ketua Pengarah Kastam memutuskan barangan ini sesuai diperjeniskan di bawah kod tarif **9613.10 100** sebagai **non mechanical pocket lighter, gas fuelled, non-refillable of plastics** berdasarkan alasan-alasan berikut :

Barangan merupakan sejenis non-mechanical, gas fuelled, non-refillable pocket lighter dengan bahagian body diperbuat daripada plastik dan menggunakan isobutane gas fuel bagi menghasilkan nyalaan api.

- *A **lighter** is a portable device used to create a flame, and to ignite a variety of combustible materials, such as a cigar, gas stove, fireworks, candle, or cigarette. It consists of metal or plastic container filled with a flammable fluid or pressurized liquid gas, a means of ignition to produce the flame, and some provision for extinguishing the flame. Alternatively, a lighter can be powered by electricity, using an electric arc or heating element to ignite the target.*
- a mechanical device used in lighting cigarettes, cigars, or pipes for smoking.

Berdasarkan ciri-ciri yang terdapat pada barangan ia adalah sesuai sebagai non-mechanical non-refillable pocket lighter.
