FOB

or

(b) Indirect/Build-Down Formula

$$\text{FOB} - \frac{\text{Value of Non-Originating Materials}}{\text{FOB}} \times 100\%$$

FOB

where—

- (a)* **AANZFTA Material Cost** is the value of originating materials, parts or produce that are acquired or self-produced by the producer in the production of the good;
- (b)* **Labour Cost** includes wages, remuneration and other employee benefits;
- (c)* **Overhead Cost** is the total overhead expense;
- (d)* **Other Costs** are the costs incurred in placing the good in the ship or other means of transport for export including, but not limited to, domestic transport costs, storage and warehousing, port handling, brokerage fees and service charges;
- (e)* **FOB** is the free-on-board value of the goods as defined in Rule 1 (Definitions); and
- (f)* **Value of Non-Originating Materials** is the CIF value at the time of importation or the earliest ascertained price paid for all non-originating materials, parts or produce that are acquired by the producer in the production of the good. Non-originating materials include materials of undetermined origin but do not include a material that is self-produced.

2. The value of goods under this Rule shall be determined in accordance with Article VII of GATT 1994 and the Agreement on Customs Valuation.

Article 6: Cumulative Rules of Origin

For the purposes of Article 2 (Originating Goods), a good which complies with the origin requirements provided therein and which is used in another Party as a material in the production of another good shall be considered to originate in the Party where working or processing of the finished good has taken place.

Article 7: Minimal Operations and Processes

Where a claim for origin is based solely on a regional value content, the operations or processes listed below, undertaken by themselves or in combination with each other, are considered to be minimal and shall not be taken into account in determining whether or not a good is originating—

- (a) ensuring preservation of goods in good condition for the purposes of transport or storage;
- (b) facilitating shipment or transportation;
- (c) packaging⁴ or presenting goods for transportation or sale;
- (d) simple processes, consisting of sifting, classifying, washing, cutting, slitting, bending, coiling and uncoiling and other similar operations;
- (e) affixing of marks, labels or other like distinguishing signs on products or their packaging; and
- (f) mere dilution with water or another substance that does not materially alter the characteristics of the goods.

Article 8: *De Minimis*

1. A good that does not satisfy a change in tariff classification requirement pursuant to Article 4 (Goods Not Wholly Produced or Obtained) will nonetheless be an originating good if—

- (a) (i) for a good, other than that provided for in Chapters 50 to 63 of the HS Code, the value of all non-originating materials used in the production of the good that did not undergo the required change in tariff classification does not exceed 10 per cent of the FOB value of the good;

⁴ This excludes encapsulation which is termed “packaging” by the electronics industry.

- (ii) for a good provided for in Chapters 50 to 63 of the HS Code, the weight of all non-originating materials used in its production that did not undergo the required change in tariff classification does not exceed 10 per cent of the total weight of the good, or the value of all non-originating materials used in the production of the good that did not undergo the required change in tariff classification does not exceed 10 per cent of the FOB value of the good; and

(b) the good meets all other applicable criteria of this rule.

2. The value of such materials shall, however, be included in the value of non-originating materials for any applicable regional value content requirement.

Article 9: Accessories, Spare Parts and Tools

1. For the purposes of determining the origin of a good, accessories, spare parts, tools and instructional or other information materials presented with the good shall be considered part of that good and shall be disregarded in determining whether all the non-originating materials used in the production of the originating good have undergone the applicable change in tariff classification, provided that:

- (a) the accessories, spare parts, tools and instructional or other information materials presented with the good are not invoiced separately from the originating good; and
- (b) the quantities and value of the accessories, spare parts, tools and instructional or other information materials presented with the good are customary for that good.

2. Notwithstanding Paragraph 1, if the good is subject to a regional value content requirement, the value of the accessories, spare parts, tools and instructional or other information materials presented with the good shall be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good.

3. Paragraphs 1 and 2 do not apply where accessories, spare parts, tools and instructional or other information materials presented with the good have been added solely for the purpose of artificially raising the regional value content of that good, provided it is proven subsequently by the importing Party that they are not sold therewith.

Article 10: Identical and Interchangeable Materials

The determination of whether identical and interchangeable materials are originating materials shall be made either by physical segregation of each of the materials or

by the use of generally accepted accounting principles of stock control applicable, or inventory management practice, in the exporting Party.

Article 11: Treatment of Packing Materials and Containers

1. Packing materials and containers for transportation and shipment of a good shall not be taken into account in determining the origin of any good.
2. Packing materials and containers in which a good is packaged for retail sale, when classified together with that good, shall not be taken into account in determining whether all of the non-originating materials used in the production of the good have met the applicable change in tariff classification requirements for the good.
3. If a good is subject to a regional value content requirement, the value of the packing materials and containers in which the good is packaged for retail sale shall be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good.

Article 12: Indirect Materials

An indirect material shall be treated as an originating material without regard to where it is produced and its value shall be the cost registered in the accounting records of the producer of the good.

Article 13: Recording of Costs

For the purposes of this rule, all costs shall be recorded and maintained in accordance with the generally accepted accounting principles applicable in the Party in which the goods are produced.

Article 14: Direct Consignment

A good will retain its originating status as determined under Article 2 (Originating Goods) if the following conditions have been met:

- (a) the good has been transported to the importing Party without passing through any non-Party; or
- (b) the good has transited through a non-Party, provided that:
 - (i) the good has not undergone subsequent production or any other operation outside the territories of the Parties other than unloading, reloading, storing, or any other operations necessary to preserve them in good condition or to transport them to the importing Party;
 - (ii) the good has not entered the commerce of a non-Party; and

- (iii) the transit entry is justified for geographical, economic or logistical reasons.

Article 15: Certificate of Origin

A claim that goods are eligible for preferential tariff treatment shall be supported by a Certificate of Origin issued by an Issuing Authority/Body notified to the other Parties as set out in Operational Certification Procedures.

Article 16: Denial of Preferential Tariff Treatment

The Customs Authority of the importing Party may deny a claim for preferential tariff treatment when—

- (a) the good does not qualify as an originating good; or
- (b) the importer, exporter or producer fails to comply with any of the relevant requirements of this rule.

Article 17: Review and Appeal

The importing Party shall grant the right of appeal in matters relating to the eligibility for preferential tariff treatment to producers, exporters or importers of goods traded or to be traded between the Parties, in accordance with its domestic laws, regulations and administrative practices.

Article 18: Sub-Committee on Rules of Origin

The ROO Sub-Committee shall submit to the Goods Committee established pursuant to Article 11 (Committee on Trade in Goods) of Chapter 2 (Trade in Goods) a final report, including any recommendations, within three years of entry into force of this Agreement.

SECTION VI PRODUCTS OF THE CHEMICAL OR ALLIED INDUSTRIES			
CHAPTER 28		INORGANIC CHEMICALS; ORGANIC OR INORGANIC COMPOUNDS OF PRECIOUS METALS, OF RARE-EARTH METALS, OF RADIOACTIVE ELEMENTS OR OF ISOTOPES Chapter Note: Any good of this Chapter that is the product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in a Party. The “chemical reaction” rule may be applied to any good classified in this Chapter if the product fails to satisfy the regional value content and change in tariff classification criteria provided for in the Product Specific Rule. Note: For the purposes of this Chapter a “chemical reaction” is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of the molecule. The following are not considered to be chemical reactions for the purposes of determining whether a product is an originating good: (a) dissolving in water or other solvents; (b) the elimination of solvents including solvent water; or (c) the addition or elimination of water of crystallization

CHAPTER 29		ORGANIC CHEMICALS Chapter Note: Any good of this Chapter that is the product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in a Party. The “chemical reaction” rule may be applied to any good classified in this Chapter if the product fails to satisfy the regional value content and change in tariff classification criteria provided for in the Product Specific Rule. Note: For the purposes of this Chapter a “chemical reaction” is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of the molecule.
