

Dagangan: 176. DOUBLE SIDED SELF ADHESIVE POLYPROPYLENE FOAM TAPE Trade Name : Double Sided Adhesive Tape Brand : g tape	Kod Tarif : 3919.10.190
Keterangan : Barangan berbentuk gulungan dengan garispusat 7.9 cm dan lebar 1.2 cm. <i>Tape</i> yang bergulung tersebut terdiri daripada 2 lapisan iaitu: lapisan <i>plastic coated</i> dengan kedua-dua sisinya diselaputi dengan lapisan <i>adhesive</i> dan <i>release paper</i> yang menutupi lapisan adhesive. Maklumat komposisi barangan berdasarkan maklumat yang diberikan oleh pembekal adalah seperti berikut : a. Release paper 35-45 % b. Polyethylene foam 35-55 % c. Acrylic resin 20-25 % d. Silicone kurang dari 0.5 % e. Solvent kurang dari 1.0 % Laporan pakar melalui laporan kimia (PJ)IKA 1936/09-0 bertarikh 30 Julai, 2009 telah mengesahkan bahawa barangan dalam bentuk gulungan, dengan garispusat 7.9 cm dan lebar jalurnya 1.2 cm. Lapisan tape terdiri daripada: a. bahagian lapisan kertas (Release paper) dengan ketebalan 0.15mm dan b. bahagian lapisan adhesive daripada polyester Barangan di import dalam bentuk lingkaran (<i>roll</i>) adalah daripada bahan polypropylene foam yang sangat nipis dan disaluti dengan polyester sebagai adhesive dikedua-dua belah permukaannya dan kegunaannya adalah <i>for light duty packing or general office application</i>. Mesyuarat Panel Penetapan Penjenisan (Ketetapan Kastam) Bil. 47 /2009 memutuskan barangan ini sesuai diperjeniskan mengikut GIR 1 di bawah kod tarif 3919.10 190 sebagai <i>doubled sided self adhesive polypropylene foam tape, in roll of a width less than 20cm.</i> Lapisan <i>polypropylene</i> adalah sejenis <i>addition polymerisation products (plastic)</i> seperti penjelasan dalam GENERAL para (1) mukasurat VII-39-5.	

GENERAL

In general, this Chapter covers substances called polymers and semi-manufactures and articles thereof, provided they are not excluded by Note 2 to the Chapter.

.....
(1) Addition polymerisation, in which single molecules with ethylenic unsaturation react with each other by simple addition, without the formation of water or other by-products, to form a polymer chain containing only carbon-carbon bonds, e.g., production of polyethylene *from ethylene or of ethylene-vinyl acetate copolymers from ethylene and vinyl acetate*. This type of polymerisation is sometimes called *simple polymerisation or copolymerisation, i.e., polymerisation or copolymerisation in the strict sense*.

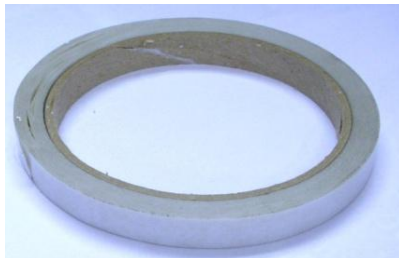

Barangan juga mendapat liputan dalam EN HS2007 di muka surat VII-3919-1:

39.19 -Self-adhesive plates, sheets, film, foil, tape, strip and other flat shapes, of plastics, whether or not in rolls.

3919.10 -In rolls of a width not exceeding 20 cm

.....
This heading covers all self-adhesive flat shapes of plastics, whether or not in rolls, other than floor, wall or ceiling coverings of heading 39.18. The heading is, however, limited to flat shapes which are pressure-sensitive, i.e., which at room temperature, without wetting or other addition, are permanently tacky (on one or both sides) and which firmly adhere to a variety of dissimilar surfaces upon mere contact, without the need for more than finger or hand pressure
